PROJECTS

Air Canvas Drawing ↗
Jun 2026

Designed and developed an intelligent Air Canvas Drawing system that leverages computer vision and hand-tracking technology to transform finger movements into digital sketches, delivering a seamless and contactless creative experience

SquatSync – AI-Powered Squat Counter ↗
Jun 2026

SquatSync is a real-time fitness web application that uses AI-powered pose detection to accurately count squat repetitions, track body posture, and provide instant workout feedback. It helps users improve exercise form, monitor performance, and achieve better training results through live analytics and progress tracking.

Portfolio Website ↗
Jun 2026

A modern and responsive personal portfolio website showcasing my projects, technical skills, certifications, and achievements with an engaging user experience.
